

Improve business efficiency • Improve employee workplace safety • Improve patient care & management

Easy to apply, peel backing

Beam Band - #291305

Identification Bands are composed of a high-density polyethylene material known as Tyvek. Designed to resist tearing and smearing even when wet, this material easily accepts pen, marker, type or embossing. Each band has an area for identification and a pressure sensitive adhesive closure. Packaged 250 in a convenient dispenser box, these bands are an inexpensive and easy to use tool for patient identification. These units include a 90 day warranty.
